THE HANGOVER PART II

Attention Projectionists and Projection Booth Managers:

For optimum 2D picture quality of **THE HANGOVER PART II**, please see the below guidelines if projecting through a dedicated 3D Sony 4K projector:

1. Ensure that 3D polarizing filter has been removed.
2. Provide 100% available electrical current to bulb.
3. If possible, replace 3D lens with 2D lens.
4. The goal is to obtain 14 ft-L (foot-lamberts) of light when playing 2D feature.

For additional information on the above, please call **Technicolor Digital Support at 800-99-FILMS (34567)** option 2.
