Instruction Manual
Model #2295

GOLD MEDAL
FUNFOOD EQUIPMENT & SUPPLIES
Cincinnati, OH  45241-4807  USA
SAFETY PRECAUTIONS

⚠️ CAUTION
This equipment is designed and sold for commercial use only. This equipment is not to be used by the consumer in home use. Do not allow direct contact of this equipment by the public when used in food service locations. Only personnel trained and experienced in the equipment operation may operate this equipment. Carefully read all installation instructions before operating the equipment.

⚠️ WARNING
Always wear safety glasses when servicing this equipment.

⚠️ WARNING
To avoid serious burns, do NOT touch the kettle while it is hot.

⚠️ WARNING
Any alterations to this equipment will void the warranty and may cause a dangerous situation. NEVER make alterations to the equipment. Make sure all machine switches are in the OFF position before plugging the equipment into a receptacle.

⚠️ DANGER
Machine must be properly grounded to prevent electrical shock to personnel. Do NOT immerse the kettle, warmer, or any other part of this equipment in water. Always unplug the equipment before cleaning or servicing.

NOTE
The information, specifications and illustrations contained in this manual represent the latest data available at time of publication. Right is reserved to make changes as required at the discretion of Gold Medal Products Company without notice.
Your Mighty-Mite Commercial Popper is the finest 16 oz. gas popper built. The kettle is extra heavy, made from a special heat-conducting steel alloy to prevent burnout or warping. Your Mighty-Mite has a heavy duty motor equipped with an extra fan and air tunnel to induce the motor to run cooler during heavy popping conditions.

Read this entire manual before attempting to operate the appliance and keep for future reference.

While unpacking your Mighty-Mite, remove all the tape and check for damage that may have occurred during shipping.

**INSTALLATION**

**IMPORTANT**: When installing and operating your new Mighty-Mite Commercial Gas Popper, you must conform with local codes, or (in the absence of local codes) with the National Fuel Gas Code, ANSI Z223.1-1980.

**UNIT PLACEMENT**

This unit is certified for use on combustible surfaces. Select a location with a minimum side clearance of 6" and a minimum top, back, and frontal clearance of 30".

**GAS HOOK UP**

Gas is safe when used properly, but can be very dangerous if used improperly. We suggest installation be performed only by a qualified service person. Gas companies have competent service people to provide safe installation. After installation, all gas connections **must** be checked for leaks using a soap solution.

![DANGER]

Do NOT use a match or flame to check for leaks. You may cause a fire or explosion!

**PRESSURE TESTING**

Disconnect the appliance and its individual shutoff valve from the gas supply piping during pressure testing at pressures greater than 0.5 psig (3.45 kPa). Before pressure testing the gas supply piping system at pressures equal to or less than 0.5 psig (3.45 kPa), the appliance **must be** isolated from the gas supply piping system by closing the manual shutoff valve.

When gas connection is complete, wire the unit to the power source which carries the current specified on the unit's data plate. Refer to the wiring diagram located inside the cabinet and in this manual (Drawing No. A-74500 for AC Model; Drawing No. A-74511 for DC Model).

**ELECTRICAL GROUNDING**

This unit must be grounded in accordance with local codes; or (in the absence of local codes) with the National Electric Code - ANSI/NFPA No. 70-1981. Secure grounded wire to the ground lug found inside the cabinet wiring junction box.
TYPES OF GAS
The nameplate is marked at the factory to indicate the gas type used, either: "LP" or "propane" for Liquified Petroleum Gas; or "NAT" or "NG" for natural gas. If necessary, the unit can be altered to change fuels, but we suggest a qualified service person do the alteration. Refer service person to the Maintenance and Repair section of this manual.

ALTITUDE RANGE
The factory sizes the burner orifices for an elevation up to 2000 feet above sea level. For high altitude operation, please contact Gold Medal Engineering for the proper orifice size.

GAS PRESSURE
Optimum popping results occur when gas pressure is adequate. For LP gas, we recommend a pressure setting of 10 inches water column (6 oz. per square inch). For Natural Gas, 4 inches water column (2 oz. per square inch). The pressure is measured at the appliance while the main burner is lit. A pressure regulator is supplied to deliver optimum pressure for both types of gas if the unit is changed from the original factory specification. Follow the instructions in the Maintenance and Repair section. Be sure properly sized piping is used to supply the needed pressure and maintain adequate gas supply.

LIGHTING
1. Turn the handle of the gas safety valve to "PILOT" position.
2. Push down the red "reset" button; depress the spark igniter. Repeat if necessary until the pilot lights. Once lit, hold the red reset button for about 30-45 seconds or until the pilot remains burning when the button is released.
3. Turn the main handle to "ON" position. The main burner should now ignite from the pilot burner.

SHUTDOWN
If you want to turn off both the pilot and the main burner, pull the lock on safety and turn to "OFF" position.

AIR ADJUSTMENT ON BURNER
After main burner is lit according to the directions above, make any needed air adjustments in order to get the best flame. Turn the Air Adjustment Cap to supply more or less air. A blue flame provides optimum heat.

CAUTION
Do not store or use gasoline or other flammable vapors and liquids in the vicinity of this or any other appliance.
Instructions on what to do when a user smells gas must be obtained from the local gas supplier and posted in a prominent location near where the unit will be operated.
TO POP POPCORN

Turn the main burner on; pour and spread oil in the kettle. You can let oil heat slightly before adding the popcorn and salt. We recommend 16 ounces of popcorn, 4 ½ ounces of high quality coconut oil, and Flavacol salt to give the best results.

NOTE: Oil and Flavacol is the secret to top quality popcorn; popcorn that brings repeat sales. If you are in a commercial pre-pop operation, you can command a higher price. To your customer, it is well worth the slight extra price.

Putting more corn in the kettle will lengthen the popping cycle and decrease overall production. You can make smaller batches, if necessary, but always use a corn to oil ration of 3:1. When using a smaller batch, turn the burner down slightly to prevent it from overheating.

CAUTION

Do not leave main burner in operation when not popping corn.

IF THE FLAME GOES OUT

WARNING

If pilot is turned off, a five minute shutdown period is required before attempting to relight.

A five-minute shutdown period is required before attempting to relight. First, check to see if you are out of gas. Then verify the thermocouple is in the proper position.

WARNING

At no time during a power failure should an attempt be made to operate this unit. If a power failure occurs during operation, the gas supply is to be turned OFF until power failure has subsided. Then, and only then, should a relight attempt be made per the Lighting and Shutdown Instructions.
MAINTENANCE INSTRUCTIONS

⚠️ CAUTION
THE FOLLOWING SECTIONS OF THIS MANUAL ARE INTENDED ONLY FOR QUALIFIED SERVICE PERSONNEL WHO ARE FAMILIAR WITH ELECTRICAL EQUIPMENT. THESE ARE NOT INTENDED FOR THE OPERATOR.

⚠️ WARNING
Adequate eye protection must be used when servicing this equipment to prevent the possibility of injury.

⚠️ DANGER
Do NOT immerse the equipment in water.
Unplug your machine before servicing.

The DRIVE MOTOR is a sealed bearing type motor that requires no lubrication.

GAS CONVERSION

1. Disconnect the power supply at the fuse box or breaker.
2. Turn off the gas supply.
   Refer to drawing number D-5019.
3. Place the kettle in dump position. Remove the retainer screws. Remove the burner (Part # 74558) to expose the burner orifice hood. Replace the main burner hood with the appropriate part number for the intended type of gas.
   Part # 74629 (#61) for LP gas   Part # 74630 (#53) for natural gas
4. Replace the pilot burner orifice with the appropriate part number for the intended gas type.
   For Pilot Burner Part # 74028:
   Part # 74029 (.011 dia. holes) for “LP” gas   Part # 74531 (.018 dia. holes) for natural gas
   For Pilot Burner Part # 57031:
   Part # 74029 (.011 dia. holes) for “LP” gas   Part # 74030 (.023 dia. holes) for natural gas
5. Remove the hex cap on the pressure regulator and position the appropriate end of the red plug down. Replace the hex cap.
   CAUTION: Orifice hoods and spuds must be screwed tight when LP gas is used.
6. Turn on gas supply and leak test all connections with a soap solution.
7. After the gas supply has been checked, turn on main power.
ORDERING SPARE PARTS

1. Identify the needed part by checking it against the photos, illustrations, or parts list.
2. Please include part number, part name, and quantity needed.
3. Please include model name and machine serial number (located on the machine nameplate) with your order.
4. Address all parts orders to:

   Jarco Industries

RED AND BLACK POWER SUPPLY WIRES ARE TO BE FURNISHED BY CUSTOMER.
WARRANTY

WE WARRANT to the original purchaser the Gold Medal equipment sold by us to be free from defects in material or workmanship under normal use and service. Our obligation under this warranty shall be limited to the repair or replacement of any defective part for a period of six (6) months from the date of sale to the Original Purchaser with regard to labor and two (2) years with regard to parts and does not cover damage to the equipment caused by accident, alteration, improper use, voltage, abuse, or failure to follow instructions.

THIS WARRANTY IS IN LIEU OF ALL OTHER WARRANTIES EXPRESSED OR IMPLIED, AND OF ALL OTHER OBLIGATIONS OR LIABILITIES ON OUR PART, INCLUDING THE IMPLIED WARRANTY OF MERCHANTABILITY. THERE ARE NO WARRANTIES WHICH EXTEND BEYOND THE DESCRIPTION ON THE FACE HEREOF. We neither assume, nor authorize any other person to assume for us, any other obligation or liability in connection with the sale of said GOLD MEDAL equipment or any part thereof.

The term “Original Purchaser” as used in this warranty shall be deemed to mean that person, firm, association, or corporation who was billed by the GOLD MEDAL PRODUCTS COMPANY, or their authorized distributor for the equipment.

THIS WARRANTY HAS NO EFFECT AND IS VOID UNLESS THE ORIGINAL PURCHASER FIRST CALLS GOLD MEDAL PRODUCTS COMPANY AT 1-800-428-2676 TO DISCUSS WITH OUR SERVICE REPRESENTATIVE THE EQUIPMENT PROBLEM, AND, IF NECESSARY, FOR INSTRUCTIONS CONCERNING THE REPAIR OR REPLACEMENT OF PARTS.

NOTE: This equipment is manufactured and sold for commercial use only.
