Projector Upgrade Systems

Retrofit Gate/Trap

Provides ideal film path geometry, extreme accuracy, automatic aperture change and unique field-replaceable runner plate surfaces. Gate and trap assemblies for both the Simplex and Century projectors retrofit directly to existing index pins and mounting holes.

Turret features ease of installation, fully automatic operation, vertical and lateral individual lens adjustment and micrometer focusing. DC drive and control logic accepts commands from all automation systems and accomplishes full lens change cycles in just two seconds.

Kelmar Projector Upgrade Systems •

BOXOFFICE Feb. 1990

Kelmar Systems, Inc. of Huntington Station, New York has developed a new lubrication system for the gear train of the Century Projector. According to the company, positive and uniform application of a new synthetic lubricant which doesn't oxidize, harden or break down under pressure is now possible while the projector is running and with the gear case door shut. The system installs in minutes into any Century Projector made in the last 30 years. It comes complete with all mounting hardware, instructions, and a generous supply of lubricant.
