Make Parts-Ordering **AS SIMPLE AS A-B-C!**

•

IN PLANNING this book we had only *one* objective—to enable you to place your order for replacement parts quickly and accurately, avoiding the costly, time-consuming errors which often result in interrupted performance and lost revenue.

That is why we have spared no time, effort and expense in making this a book which will literally place the information you want right at your fingertips.

We have given particular attention to the illustrations and have used the modern art technique known as the “exploded view” in which each part may be clearly seen in relation to its associated units in each assembly.

We believe you will find that with this book as a guide, ordering Simplex parts becomes as simple as A-B-C—

A—*Locate the part you want on the illustration.*

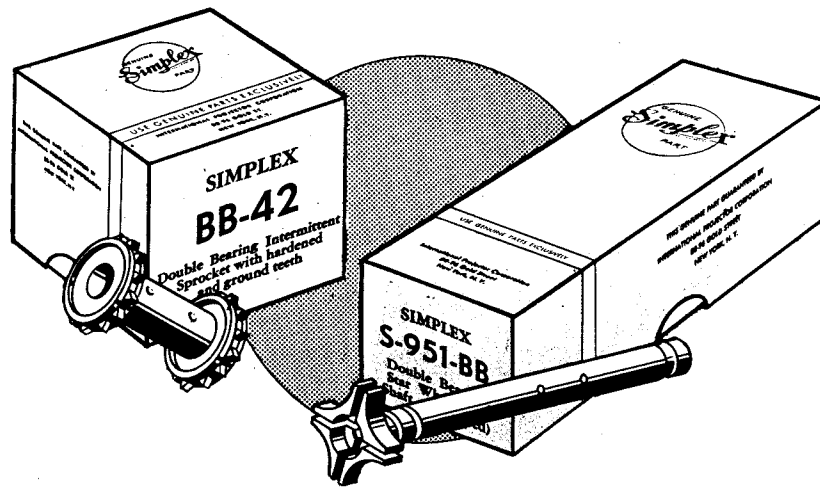

B—*Jot down the part number.*

C—*Place your order with your nearest NATIONAL branch.*

USE ONLY **GENUINE** *Simplex* PARTS

*Safeguard your
most Valuable Assets*

GOOD PROJECTION • PLEASSED PATRONS
with Genuine
S I M P L E X P A R T S

Join the ranks of SIMPLEX Owners for they are the ones that lead all others in loyalty to the Projectors and Parts they are using today. Men who have seen them at work for well over three decades—men who have put their trust in them and found their confidence justified—they are the men that proudly tell others about the extraordinary performance and rugged dependability of Simplex Projectors and Simplex Parts.

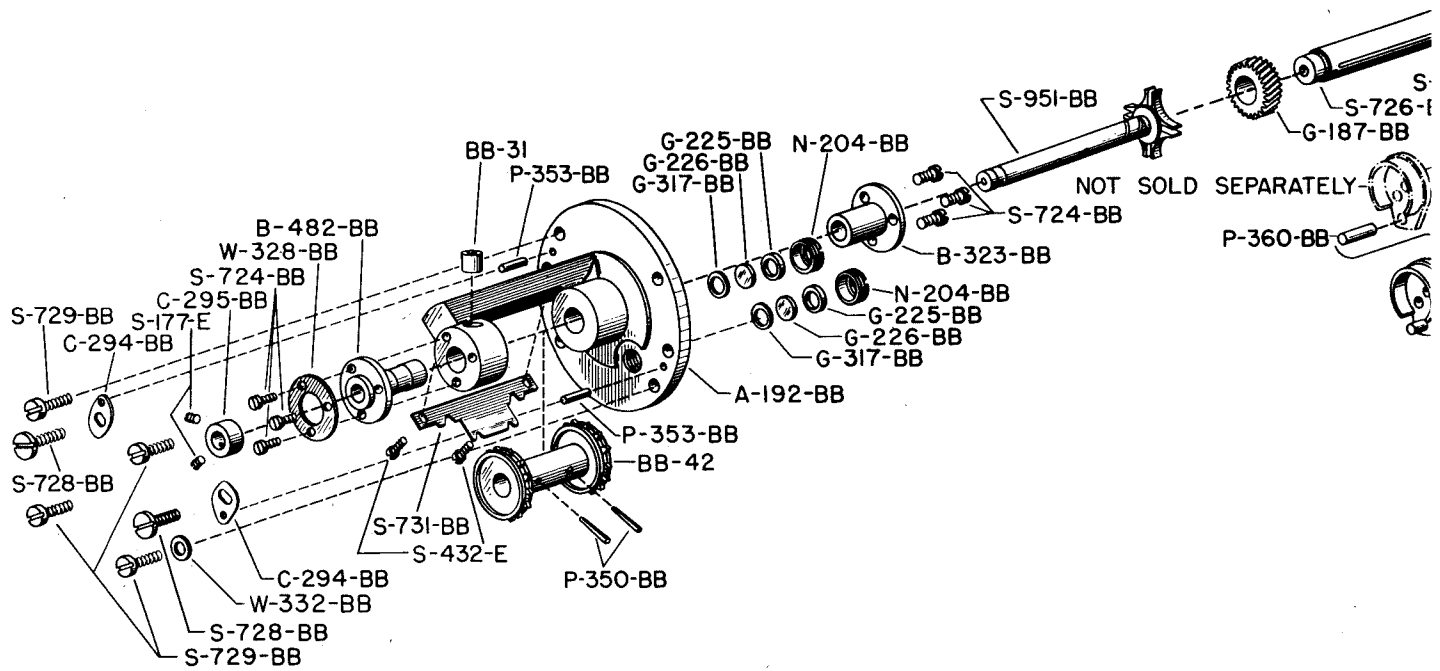

And when replacement parts are necessary, demand and use only Genuine Simplex Parts—packed in the distinctive yellow and black box—your guarantee of Better Projection.

BETTER PROJECTION PAYS

ACCESSORIES

Manufacture of the Simplex Single Bearing Intermittent Movement was discontinued in 1933. Complete and partial factory repairs to this unit were discontinued in 1939.

This move was made in the interest of better projection. The use of Simplex Double Bearing Intermittent Movements in theatres for years has proven beyond doubt their performance superiority. Hardened and ground parts, closer accuracy in manufacture and longer wearing qualities are but a few of the many advantages that all result in better projection and a steadier picture.

The Simplex Double Bearing Intermittent Movement is illustrated on pages 8, 9 and 10. It directly replaces the Simplex Single Bearing Intermittent Movement without additional parts or alterations in any Simplex Regular Mechanism.

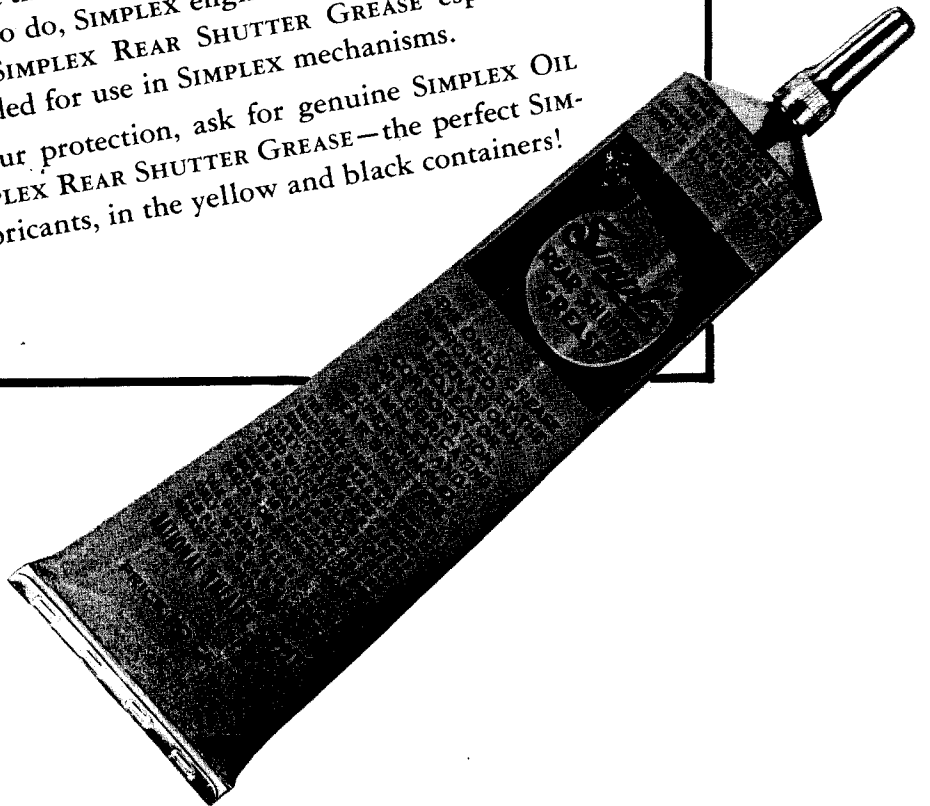

MAKE A BETTER PROJECTION CHANGE NOW.

LIKE ALL fine precision machines, SIMPLEX projectors require proper periodic lubrication to continue functioning at peak efficiency.

To assure that this lubrication is exactly suited to the job it has to do, SIMPLEX engineers have had SIMPLEX OIL and SIMPLEX REAR SHUTTER GREASE especially compounded for use in SIMPLEX mechanisms.

For your protection, ask for genuine SIMPLEX OIL and SIMPLEX REAR SHUTTER GREASE—the perfect SIMPLEX lubricants, in the yellow and black containers!
